🟠 MEDIUM — Milestone-Less Opportunities

All pipeline opportunities have milestones attached.

Recommended Actions

1. **J&J deep dive** — YoY -10% on $41.2M is the biggest ACR erosion. Cross-reference with snovose on Fabric Redshift and Butterfly deals. The 946d stale Butterfly opp needs closure

or reset.

2. **Kenvue MoM watch** — -11% MoM on $27.0M. Check with jtariq on R&D Gen AI Platform (196d at 4-RV) — is consumption tied to this deal landing?
3. **Pfizer blocked milestones** — 2 exec escalation-customer milestones on AWS migration + $35M Data Center Closure at risk. Coordinate with jorivett on unblocking path.
4. **Portfolio stale hygiene** — 77.7% of opps (533/686) are stale >60d. Targeted CRM cleanup for opps >180d (ThermoFisher 417d, Pfizer 385d/614d, Kenvue 411d, BD 315d, J&J 946d).
